

STOP BAD “FUR” DAYS!

Do you ever have a bad hair day? Don't risk a bad “fur day” for your dog! Professional grooming has many advantages. Ms C's recommends professional grooming for your dog at least every six week.

Dogs' uneven toenails can scratch floors & furniture, or worse yet, your legs. Hair and dirt in ear canals can cause infection. Professional groomers have the proper tools to remove matted hair, clean waxy/hairy ears, and file toenails, while providing a classy haircut. Groomers can identify and remove parasitic infestations such as fleas, and ticks that might transmit diseases to people. They recognize signs such as ear infections, lumps and moles, and possible skin cancer, referring owners to a veterinarian. Hire a groomer to do the tasks you won't, can't or don't know how to do.

Reading dog's sign language is imperative to assuring a pleasant, fun grooming experience. At Ms C's we do not engage in assembly line grooming, we provide rest time, and cuddles during the process. We believe in getting dogs in/out as quickly as possible. Dogs should be at the salon only a couple hours, not all day. We have many geriatric dogs who have lost vision and hearing, patience is the key. Patience builds trust in the dog. Trust is vital in providing a great grooming experience.

Each dog is an individual with their own needs. Give John, a call today to discuss your dog's bad fur days.
